

Leaders for tomorrow

Digital Practice Group

International Executive Search

Talentor is an international executive search and recruiting network specialised in the middle and upper management segment. Regardless of whether the client is large and global or small and local, Talentor's combination of global reach, local presence and extensive practical knowledge make us a powerful partner. Talentor offers local expertise with trusted partners for search projects in more than 27 countries on 4 continents.

Partnering with Leading Digital Innovators

Becoming truly digital is difficult. Not just the exterior of a business has to be digital, but also the inside: strategy, IT-systems, culture, processes, HR-policy. In the Talentor network, we share experiences in the digital world. Talentor executive search knows how and where to recruit top digital leaders. We work closely with some of the most influential digital leaders in different industries, and thus have insights into what is needed to manage digital transformation successfully with the right people.
